A Daimler Company

Soldier on - at the end is the right colour!

---

Equipment supplier insolvency proceedings, building turnkey supplier liquidation, Covid 19 lockdown, extended lockdown and Covid 19 Regulations and Health and Safety measures.

For a client and project team to navigate these and other dynamics during the latter part of a project does not happen over a quick breakfast (or a spin in a luxury German motor vehicle).

In the previous update on the project I alluded to the change in equipment supplier and the immediate noticeable impacts of the insolvency issues. The months since then at times seemed grey and tested us all in our commitment to complete the project (in no small margin due to the dark Covid 19 cloud).
